Education

Pandit Deendayal Energy University — Gandhinagar, Gujarat
B.Tech, Computer Science and Engineering — CGPA: 8.49/10 — *July 2023 – June 2027*

Experience

TechErudite — On-site
AI/ML Intern — *May - July 2026*

- Developed a production-grade ML system to predict patient no-shows for an external client, achieving 94.6% recall against a target of 90%, helping reduce scheduling inefficiencies.
- Built automated data and model pipelines processing 500000+ patient records, reducing model retraining time from 2 hours to 30 minutes approx while ensuring PII-compliant data handling.
- Implemented MLOps workflows with automated deployment, monitoring, and model versioning, reducing deployment effort by around 85% and enabling real-time predictions within 250 ms latency.

Innovation Intellect Pvt. Ltd. — On-site
Machine Learning Intern — *June - July 2025*

- Developed motion detection and human sentiment analysis modules as part of a V0 CCTV analytics solution for GSRTC, laying the groundwork for future automated theft detection capabilities.
- Leveraged pre-trained computer vision models for facial detection, gesture recognition, and behavior analysis to support scalable surveillance intelligence from CCTV footage.

Projects

Apex Learning [GitHub | Live]

- Full-stack learning platform where users purchase courses, practice MCQs, and receive AI-generated questions with instant scoring; progress tracked end-to-end.
- Designed backend with JWT + RBAC, REST APIs, secure file delivery via Azure Blob signed URLs, and AI-driven MCQ generation.
- React, Tailwind CSS, FastAPI (Python), Supabase/PostgreSQL, Azure Blob Storage, Razorpay, Gemini APIs.

Real-Time Weather Forecast [GitHub | Live]

- Streaming ML system ingesting live weather data, running inference, and storing results for visualization with drift monitoring and automated retraining.
- Deployed a production-like pipeline (Kafka → ML inference → MongoDB → Streamlit) on Ubuntu VM using Docker.
- Python, Kafka, MongoDB, Streamlit, scikit-learn, Docker.

Technical Skills

Languages:	Python, C++, JavaScript
Frameworks:	Scikit-Learn, Matplotlib, Seaborn, NumPy, Pandas, LangChain, YOLO, Streamlit, FastAPI, React.js
Tools:	GitHub, Supabase, Microsoft Azure Blob Storage, DigitalOcean
Databases:	MySQL, PostgreSQL, MongoDB, PostGIS
Domains:	Machine Learning, Full-Stack Development, Data Engineering, FinTech, Cloud-Ready Applications

Achievements

- **Winner, Pre Tech Nova Hackathon** — 1st place.

Co-Curricular Activities

Anirveda – Techno Economic Club, PDEU
Chief Coordinator — *2025 – 26*

- Directed Economania 2026 PDEU's largest techno-economic festivals with a Rs. 6.34L budget and Rs. 3.8L+ sponsorships.
- Scaled Breach 2026 into Gujarat's largest FinTech hackathon (Google-recognized), managing a Rs. 2L prize pool and attracting participation from 100+ colleges.

Event Management & Creative Head — *2024 – 25*

- Led flagship events, logistics, budgeting, and sponsorship execution; secured 7+ sponsorship deals generating Rs. 5.4L and contributed to consecutive features in Gujarat Samachar.

Sub-Committee Member — *2023 – 24*

- Organised IPL Auction, Global-o-poly and Ambush events.

Certifications

- **AWS Cloud Practitioner** – Amazon Web Services
- **Fundamentals of Deep Learning** – NVIDIA
- **Digital Classroom – MLOps**
